"Lightness of a 'Dorothy Dodd'"

On the Scales

A great many interesting facts may be discovered with a pair of scales, but it it is doubtful if any single fact will be more interesting and valuable to the average woman than the weight of her shoes.

For this tells her the number of ounces that must be lifted thousa ids of times each day, and a little calculation will show that she lifts tons of shoe leather a day-no small labor in itself.

The "Dorothy Dodd" shoe saves the lifting of more than one and one half tons every day. A pair of "Dorothy Dodd" shoes are several ounces lighter than ordinary shoes. The teet are just so much more comfortable, and you are so much less tired. Put a pair to the test!
